## Skills

### Programming Languages

Javascript, Typescript, Python, HTML/CSS, Lua, Java, MySQL & SSMS, PHP

### Libraries & Frameworks

React, React Native, .NET Framework, ASP.NET Core, Bootstrap, Git, Github, Node.js

### Tools & Platforms

Devops, Vercel, Heroku, Figma, Firebase, AWS, MongoDB Atlas

## Languages

Portuguese  
English

## Interests

User Experience Design, Web Accessibility Advocacy, Outdoor Activities, Continuous Learning

## Relevant Experience

### Software Developer, Samsys March 2022 – March 2023

During my tenure at Samsys, I played a pivotal role in numerous projects, collaborating effectively with cross-functional teams to drive successful outcomes and achieve project objectives.

#### Key Projects:

- 1. Zapsys**
  - A robust software solution that streamlined operational processes and enhanced user experience.
  - Collaborated closely with stakeholders to gather requirements and ensure alignment with business goals.
- 2. Samsys Internal Management Websites**
  - Spearheaded the creation of internal management websites that improved workflow efficiency and data accessibility for team members.
  - Designed and developed user-friendly interfaces, facilitating better communication and resource management within the organization.
- 3. Partnership Software Solutions**
  - Contributed to the development of various software applications for Samsys partners, tailoring solutions to meet specific client needs and enhance overall service delivery.
  - Engaged in comprehensive testing and quality assurance to ensure optimal performance and reliability.

#### Skills Developed:

- Strengthened my ability to work collaboratively in agile teams, adapting to evolving project requirements and timelines.
- Enhanced problem-solving skills through real-world challenges in software development and project management.
- Gained proficiency in modern development practices and tools, fostering a continuous learning mindset.

## Education

Course: IT Management and Programming Technician

Duration: 2019-2022

Overall Grade: 18

#### Key Projects:

##### Final Project (PAP):

- Created a school management application that includes features such as enrollment control, grade management, and reporting for both teachers and students.
- The project was evaluated with the **highest grade of 20**, demonstrating my ability to effectively apply programming concepts in a practical setting.

#### Skills Developed:

- Programming Languages: Gained proficiency in Javascript, HTML/CSS, Database Management, PHP.
- Software Development: Developed functional applications with an emphasis on user interface design and usability.
